

INSTRUCTIONS

FOR BEST RESULTS USE ALL WASH FUNCTIONS

- Change machine is located at front of Office
- Time starts immediately coins or tokens are inserted
- Select desired function first then insert coins or tokens
- For best results start at function one and work clockwise
- Always rinse the foam brush first to avoid scratching
 - Gun flow is controlled by applying pressure to the trigger
- Any function may be selected whilst there is still time left on the clock

1. ENGINE DEGREASER

BENEFITS Quickly removes stubborn soiling such as oil, grease, dirt and grime.

PROCESS Apply degreaser to any areas needed and on and around engine allowing time to soak in.

2. WHEELS & TYRES

BENEFITS Dissolves road grime, brake dust and cleans tyres.

PROCESS Apply generous amount to all wheels and tyres allowing time to soak in.

3. PRE-WASH ACTIVATOR

BENEFITS Formulated to break down and dissolve any dirt and oily road grime before other wash processes.

PROCESS While surface is dry apply over entire vehicle ensuring all areas are soaked heavily. This is the most crucial part in the wash process.

4. SOAP HIGH PRESSURE

BENEFITS Assists in removing stubborn bugs, soils and pre soak chemicals from vehicle.

PROCESS Start at roof washing down complete vehicle and finishing at the wheels.

5. FOAM BRUSH

BENEFITS Foam brush has a lubricated foaming soap that assists the wash brush giving a final clean and glossy shine.

PROCESS Whilst vehicle is wet use the brush with light pressure scrubbing entire vehicle starting at roof and finishing on wheels.

6. HIGH PRESSURE RINSE

BENEFITS High pressure rinse will remove all soaps readying your vehicle for the final steps.

PROCESS Start at roof washing down complete vehicle and finishing at the wheels. (If Engine Degreaser was used rinse off motor)

WARNING Avoid High Pressure Water on any engine electrical components.

7. SPLATTER WAX

BENEFITS Carnuba infused splatter wax will give your vehicle an instant lasting shine doing all the hard work for you.

PROCESS Use the splatter wax gun to apply the foaming wax liberally to your entire vehicle.

8. CERAMIC PROTECTIVE COAT

BENEFITS Ceramic protective coat bonds to your vehicles paint and outer surfaces creating a protective layer to repel dirt and grime whilst leaving your paint silky smooth aswell as lasting protection from UV and oxidation.

PROCESS Start at roof washing down complete vehicle and finishing at the wheels.

9. SPOT FREE RINSE

BENEFITS Spot free rinse prevents any spotting or water marks after water dries on your car by using pure water that is treated to remove all minerals.

PROCESS Start at roof washing down complete vehicle and finishing at the wheels.

SOME FUNCTIONS USE RECLAIMED WATER - Do not drink
